

INFORMATION THAT MAY HELP GET AN UNDERGRADUATE RESEARCH POSITION

Faculty member:

Last Name **KOUDELKA**

First Name: **GERALD B.**

1. What do you look for in a potential undergraduate researcher?

I look for motivation, interest in subject and which student labs candidate has completed. Also, student should not have a class rank higher than junior status.

2. What are the best times of the year for students to look for a spot in your lab?

Mid Fall Semester

3. What do you expect from an undergraduate researcher?

I expect 10-30 hours per week, depending on the number of hours of registration. A candidate must have at least two 3-4 hours blocks of time available per week.

4. What can the student expect to be doing in your lab?

Working under supervision of a graduate student or me doing independent research. Research methods used vary from computational, molecular and microbiology, depending on project, student interest and student background.

5. What is the best way to approach you about getting research in your lab?

To make an appointment by e-mail koudelka@buffalo.edu

6. What kind of repayment can the student expect?

Course credit. Possible paid research assistantship in summer

7. If course credit is given, what does it take to get an A?

Dedication, good attitude, and good work habits are expected for one to receive an "A".

8. Do you have room in your lab now, or foreshadow when you will?

Openings vary. Please contact me for further information.
